More

Giving you all the tools you need to make every visit count

Kiosk app

Our iPad app allows your visitors to check in themselves so you can focus on giving them a friendly welcome.

Customization

Make your check-in process reflect your brand identity. You can choose your colors, upload your logo and background image, and personalize the text on every screen. [See on Pinterest how our customers brand their Welcome](#)

Visitor recognition

Show your visitors that you've been expecting them. Have their name appear on the screen as they check in. They feel reassured that they're on your list and their visit is off to a good start.

Instant pictures

Visitors can take their picture directly with the iPad. The photo is printed on their badge and is saved in your address book. It can also be sent to the host so he recognizes his guest easily.

Smart rules NEW

Smart rules are a way to adapt the series of check-in screens based on your visitor's answers. If she says she's not visiting your lab, she won't see the screens on lab security. [Learn more](#)

Multiple languages

Already available in more than 18 languages, our kiosk app greets visitors from everywhere. Need an additional language? Just ask and we'll add it. Bienvenue, Willkommen, 欢迎!

NDA

Your visitors can sign your NDA or health and safety instructions right on the screen. And you can save all signed documents directly in Proxyclick and OneDrive.

Express check-in

To make check-in even faster, QR codes are included in your visitors' invitation emails and can be added to their digital wallets (smartphones, smart watches etc.). [Learn more](#)

Multiple locations

Whether you have more than one door to your building or multiple offices around the world, you can use one single Proxyclick account to manage them all. Added bonus: all your locations inherit the features of your highest plan.

Multiple tenants

Share a building with other companies? Use the same tablet to greet all visitors. Your guests select your logo on the screen and check in.
